Copying these members to the iSeries:

a) Import this i Project to RDi.

b) Assign a connection and a library to the i Project.

c) Push the project to the IBM i.

This Base64 encoder/decoder was initially developed by Scott Klement.
The following procedures have been added by Thomas Raddatz

- base64_encodeBufferToStream()
- base64_encodeStreamToStream()
- base64_decodeBufferToStream()
- base64_decodeStreamToStream()
- base64_getUserData()()

- EXAMPLE01
- EXAMPLE02
- EXAMPLE03
- EXAMPLE04 (requires Scott Klements YAJLR4 service program)

- EXAMPLE11
- EXAMPLE12
- EXAMPLE13
- EXAMPLE14 (requires Scott Klements YAJLR4 service program)
